

## LM 366 BASKET STOPPER INSTALLATION

1. Basket stopper is to be placed on the rack so, that the longer edge is below the sliding track. The location of the stopper can be set by pulling the basket out of the rack as far as you like.

The further away the stopper is, the more the basket will open out.

2. Put the basket stopper onto the rack side a bit downwards by using both hands.

Repeat the phases in all the baskets. Basket stopper can be removed by using both hands.
